THE NATURAL CHOICE

# >> ALPHA 10 Clay Roofing Tiles

The Jacob Alpha 10 is a large flat interlocking clay tile made at Commenailles in the Jura. Its pleasing proportions combine with a tapered leading edge to give this tile a modern appearance. It is laid broken-bonded.

Thanks to its size and variable gauge it offers an ease of installation which has given the Alpha 10 ever-increasing success in the Rhone-Alpes, Bourgogne, Franche Comté, Alsace and Ile de France areas.

In order to meet demand an extra production facility has been established at Quincieux where the product is known as the Ste Foy Alpha 10.

This clay tile, as with all made by Imerys Roof Tiles, bears the hallmark of distinction of a world leader supported by technical excellence at all 13 manufacturing locations.
