THE NATURAL CHOICE

>> OMEGA 10 Clay Roofing Tiles

Flagship of the S^{te} Foy portfolio, the Omega 10 is a large format strongly profiled clay tile made at Quincieux and at S^{te} Foy l'Argentière in the Rhodanien region. It has a unique appearance thanks to its rebated, hidden headlock and pleasing relationship between its bold roll and flat area – features much appreciated by buyers looking for the aesthetics of the genuine canal tile, but without the cost implications.

The Omega 10 offers a 20 mm vertical tolerance and 25 mm lateral tolerance plus an extensive and imaginative range of matching accessories. This clay tile, as with all made by Imerys Roof Tiles, bears the hallmark of distinction of a world leader supported by technical excellence at all 13 manufacturing locations.

Ref. 104
