IMERYS Toiture

THE NATURAL CHOICE

>> ARBOISE SCALLOP Clay Roofing Tiles

The Jacob Arboise scallop is a small format flat interlocking clay tile made at Commenailles in the Jura. It must be laid broken-bonded and at steep roof pitches. A modern concept, its shape plus longitudinal and cross cambers replicate all the aesthetics of a traditional scalloped clay plain tile. The range of colours ensure that this Clay tile is appreciated particularly in the Alsace and Franche-Comté region.

This clay tile, as with all made by Imerys Roof Tiles, bears the hallmark of distinction of a world leader supported by technical excellence at all 13 manufacturing locations.

Ref. 300
NF

Main Characteristics

Flat interlocking tile	Laid broken-bonded
Length overall ≈320 mm	Weight per m ² ≈45 Kg
Width overall ≈235 mm	Variable gauge ≈220mm
Unit weight ≈2 Kg	Working width ≈200 mm
Coverage per m ² ≈22,5	Number per pallet : 480

COLOURS

Natural red

Slate

Burnt red
