THE NATURAL CHOICE

# >> BEAUVOISE Clay Roofing Tiles

The Beauvoise is a small format flat interlocking clay roof tile and clay slate made at St Germer de Fly in the Beauvais region.

It must be laid broken bonded and at steep roof pitches. With its thin leading edge and attractively balanced format this concept has endless applications both as an interlocking plain tile and as a clay slate.

The quality of the clay in the Beauvais region ensures consistently high quality and performance.

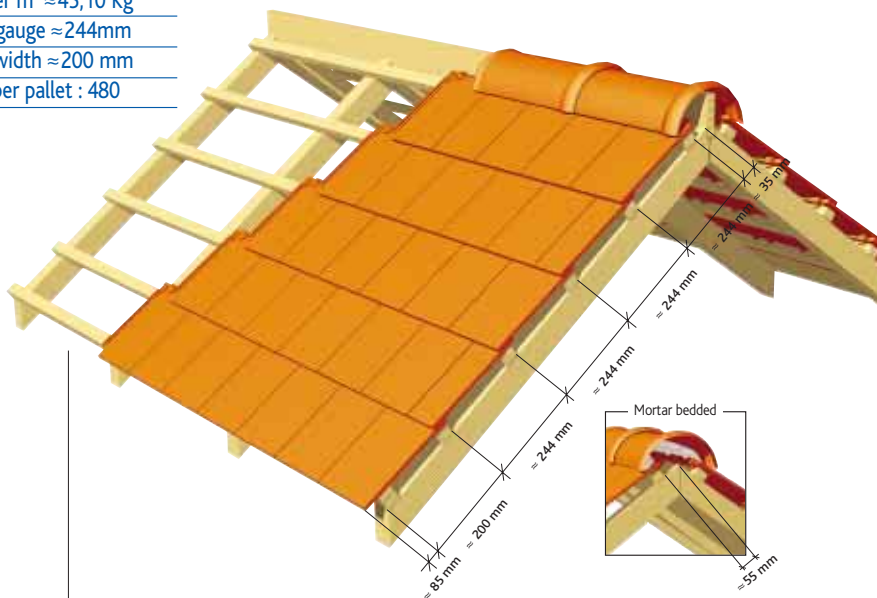

This clay tile, as with all made by Imerys Roof Tiles, bears the hallmark of distinction of a world leader supported by technical excellence at all 13 manufacturing locations.

Ref. 302

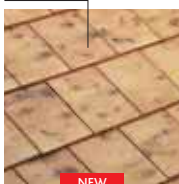

## Main Characteristics

Flat interlocking tile	Laid broken bonded
Length overall ≈313 mm	Weight per m <sup>2</sup> ≈45,10 Kg
Width overall ≈235 mm	Nominal gauge ≈244mm
